Guidance Notes

The **Heritage Statement** should identify all **heritage assets** potentially affected and their settings; describe their significance; and assess the potential impact of the proposal on that significance, including direct physical change and change to their setting.

Heritage assets include designated and non-designated assets, as well as both buildings and below ground archaeology.

The **National Planning Policy Framework (NPPF)** (Department for Communities and Local Government, July 2018) sets out the government's planning policies for England and how these are expected to be applied. The relevant section which relates to heritage is: **Section 189** which states that:

In determining applications, local planning authorities should require an applicant to describe the significance of any heritage assets affected, including any contribution made by their setting. The level of detail should be proportionate to the assets' importance and no more than is sufficient to understand the potential impact of the proposal on their significance. As a minimum the relevant historic environment record should have been consulted and the heritage assets assessed using appropriate expertise where necessary. Where a site on which development is proposed includes or has the potential to include heritage assets with archaeological interest, local planning authorities should require developers to submit an appropriate desk-based assessment and, where necessary, a field evaluation.

National Planning Policy Framework:

For **further information** on assessment of significance and assessing the potential impact of a proposal on that significance, including setting, can be found in (or their future updates):

- CLG (2012) **National Planning Policy Framework (NPPF)** (especially paragraph 17, Section 12 and Annex 2 Glossary)
- CLG (2014) **Planning Policy Guidance (PPG)** (especially 18a, paragraph 001-063)
- Historic England (2015) **Good Practice Advice (GPA) note 2 Managing Significance in Decision Taking in the Historic Environment**
- Historic England (2015) **Good Practice Advice (GPA) note 3 The Setting of Heritage Assets**

The NPPF and PPG also include a Glossary and explanation of terms, such as 'heritage asset', 'setting' and 'significance':

Heritage asset: A building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decisions, because of its heritage interest. Heritage asset includes designated heritage assets and assets identified by the local planning authority (including local listing).

Setting of a heritage asset: The surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance or may be neutral.

Significance (for heritage policy): The value of a heritage asset to this and future generations because of its heritage interest. That interest may be archaeological, architectural, artistic or historic. Significance derives not only from a heritage asset's physical presence, but also from its setting. (NPPF Annex 2: Glossary)
