

### Existing external appearance

### Proposed external appearance

Window size:

180cm width x 100cm height

Change garage door to window (measurements shown above) with two side openings (to match living room window opening type).

Fix existing render near current garage door and render new wall built in place of the garage door. Render whole porch to match so front is uniform in appearance. Painted off-white colour. Paint existing pebble dash on front of property to match colour of render.
