Refuse Collection for new builds as per past comments in regards to bin positioning (Nearest point to collection vehicle), bin collection points (at end of private drives/service roads), ability for up to a 32 tonne RCV to preferably drive in/out of areas or enough room to reverse into areas.

Storage areas should be at least accommodate up to potentially 3 x 240 Wheeled bins (Green/General Waste, Blue/Re-cycling, Brown/Garden Waste-Optional) with a view depending on future Government Legislation for Extra bins or Boxes.

Thanks
Stuart
