

SWIFT ALERT

Site address:-

Welland Cottage, 9 Main Street
Seaton.
Oakham.
Rutland.
LE15 9HU

Date 26.05.2021.

Reference RCC planning application 2020/1404/FUL. (SWIFT ALERT)

In response to above planning application and delegated officers report regarding swift alert area. I have studied the website mentioned in the report, and now submitting plans in accordance with the details requested.

I propose to site 3 "Zeist" type boxes on existing North facing wall, the boxes will be constructed from 12mm ply and painted externally. The intention is to copy the details of the Zeist type boxes obtained from the Swift alert website. The website also mentions that the boxes should be installed a minimum of 4500mm from floor level, however, due to the existing building construction and lack of height under eaves, the 4500mm height can not be achieved, and will be more in the region of 3650mm. Also the boxes would be more suited to the locations shown due to presence of telephone wires to the opposite side of the house.

Supporting documents are included and attached in e mail to Rutland Council.

Hoping everything is acceptable, please let me know if any further information is required.

Once I hear back from you and all is acceptable, the boxes can be installed to coincide with the 3 month period stated in the officers report.

Regards

Steven Courtney
