Domestic clients have responsibility for Health & Safety matters, the Construction (Design and Management) Regulations 2015 (CDM 2015) now apply to Domestic clients. CDM 2015 states that a domestic client is any individual who has construction work carried out on their home, or the home of a family member, that is not done as part of any business.

While CDM 2015 places client duties on commercial clients in full, such duties for domestic clients normally pass to either:

The contractor, if it is a single contractor project, who must take on the legal duties of the client in addition to their own as contractor. In practice, this should involve little more than what they normally do in managing health and safety risks.

The principal contractor, for projects with more than one contractor, who must take on the legal duties of the client in addition to their own as principal contractor. If the domestic client has not appointed a principal contractor, the client duties must be carried out by the contractor in control of the construction work.
