Dear Paul,

LETTER TO AGENCY (NE/2018/129172/11-L01)
WHIPPENDELL ROAD, WATFORD (Planning Ref: 19/01401/DISCON)

I write following the email from the Environment Agency dated 12 May 2021 in relation to the above site. It is good to see that the analytical results and that turbidity monitoring to date are compliant and that the Agency are happy with the progress.

The piling and major ground works have now finished at the site, with piling cut down and ground beams all completed in April 2021. Furthermore, no significant impacts have been recorded to date over the groundwater monitoring rounds.

To that end, WDE would like to propose that post groundwater monitoring now be revised to quarterly rounds and if there is no further impact that the monitoring programme cease in January 2022. In accordance with Condition 3 on the consent 18/00269/FULM, please can you provide confirmation that the proposed change to the monitoring schedule partially cleared under Condition 5 of the same consent is acceptable.

I look forward to hearing from you.

Yours Sincerely
WDE CONSULTING LIMITED
