Hi Michelle,

Following on from our conversation regarding the Sycamore tree requiring remedial work please feel free to cut and paste the information below in to your application.

**8. Trees - Additional Information**

The tree is a mature Sycamore adjoining the boundary to the rear gardens of Rorkes Close, St Budeaux. I estimate the cost to repair/replace property in the event of failure to be in the region of £3500.

The tree has significant basal decay and 40% of the crown is dead. A large dead section of the tree is over hanging the boundary wall and neighbour properties.

Ivy has engulfed a significant percentage of the crown, increasing wind loading and the likelihood of failure.

Using the Quantified tree risk assessment method the Risk of Harm has been calculated as being 1/3,000. (Target range 3: property range £2K -£20K, Probability of Failure 2)

Hope this is of use!

Regards

John

Good morning Michelle,

Not a problem. Shall I provisionally book you in the diary for 8-10 weeks' time?

A TPO application process is 8 weeks from the time that the application is received.

I would suggest that you email and retain copies of the application as we have had several go astray in recent weeks.

Regards,

John

Hi John

I have just checked and the tree scheduled to be removed is subject to a TPO, I have received the necessary forms from PCC and will complete and return them today, but work will have to be put on hold until I receive the ok from them, I will let you know as soon as I hear but they have advised me this could take up to 6 weeks.
