The replacement blocks facing onto the gardens by and large follow the same footprint as the existing buildings. This preserves the gardens intact and is therefore supported. Redevelopment of the site would increase housing supply in accordance with strategic objectives to deliver new quality affordable housing in the borough. The overall principle of the redevelopment of the site is supported; however further design detail would be required in order to ensure that the use of materials within the site would be of a high quality that would compliment the surrounding Conservation Area.
