

East Facing Elevation (B-B) (Proposed Layout)
Scale: 1:100

North Facing Elevation A-A (Proposed Layout)
Scale: 1:100

Proposal Details:

This project involves a replacement back up emergency generator unit, new equipment housing for emergency power equipment, and principally new Air Source Heat Pump units and server farm cooling plant, co-located within a new secure fenced equipment enclosure which allows exhaust heat from the server rooms to be used to increase the efficiency of the new Air Source Heat Pump equipment which will provide central heating for the building, allow the existing gas boilers to be operated only during during peak periods.

This project allows the Council to make a positive step towards being net carbon neutral in the future.
