pack of 6 solar lights

Arena Lights, pack of 6 solar lights

£1,145.00 inc. VAT

The SolarMate Arena Light is simply the brightest and most efficient way to bring flood light illumination to areas where no grid power exists such as sports grounds, riding rings, festival sites etc.

SolarMate Arena Light is a 1000 lumen brightness flood lighting system that is self powered using its highly efficient solar cell and internal lithium battery pack. Arena has two operation modes:

Motion Activated Mode –

at dusk Arena shines at 50 lumens to provide ambient lighting but when it detects movement within 8m of its sensor, the brightness increases to 500 lumen to flood a 150sqm area. When the movement comes to an end or after 30 seconds, the light goes back to 50 lumens.

Timed Illumination Mode

- using the supplied remote control Arena can be set to work constantly for 1 hour or 2 hours. Once 2 hours has elapsed the timer can be reset again. Also the brightness can be increased from 500 lumens to 1000 lumens giving light coverage of 200sqm per light.

Delivery is just £9.49 to most of the mainland UK.

INSTALLATION

We offer an installation service which is available to customers in selected locations. This includes mounting on 4 meter poles, and the price for this service including supply of the lights is from £1,745.00.

Please contact us for further details about this service.

Only six Arena Lights are all that is needed to flood and area of 40m x 20m with enough illumination for night time horse exercising or 5-a-side football for example.
