

## Work to Trees at 28 Norham Drive

Tree 1: Removal of ash tree as it is too close to the property (3m), overhangs the property, and creates excessive shade in the garden. The proximity to the property creates problems with house insurance cover. This tree has previously been thinned and crowned to try to control the growth, however it is still too large for the location.

Tree 2: Thinning of ash tree by 30% as it creates excessive shade in all adjacent gardens.
