Further to my visit to inspect one tree, please find my recommendations below.  
Please note the inspection was visual from ground level only on a dry day.

T1 – Large Sycamore Tree at rear of property. The tree is multi stemmed and growing on a banking through the conifer hedge. There has been signs of limbs shedding in high winds. Due to the tree overhanging the main road and the root system being shallow due to the banking removal is recommended.

Please find application and plans enclosed.

Kind regards  
Andrew Smith
