

We are applying for retrospective planning permission for a garage at the rear of our property, alongside access via the bridle way which is also situated to the rear.

The bridleway runs from Vigo Road to the Gravesend Road, which is approximately 800 metres long. This bridleway services multiple houses as their sole access, it also is used for accessing the fields and is regularly used by vehicles and members of the community to access their dwellings.

The garage is to be clad in a cement fibre board to be in keeping with the surroundings. There will be new 6ft fence with trellis to be fitted to the rear of the boundary, along with a matching 5m sliding gate to secure and form our boundary. There will be concrete hard standing to be laid in front of garage.

The garage will be used for domestic use only.
