

To cut down large conifer  
To rear of 4 Woodside located  
in back garden on the right  
side in the corner.

Reasons for wanting to cut  
down is that it's overhanging  
neighbouring garden over a glass  
conservatory, blocking sun out of  
the garden, unable to get sky  
T.V as engineer for sky said  
it's blocking line of signal and  
also not able to get good signal  
with normal aerial because located  
inside roof as it's a conservation  
area so tree not helping with that  
so on most days can't even watch  
T.V.
