1.0 JUSTIFICATION

We are proposing to temporarily remove the metalwork to the main entrance gates of Wormington Grange for reinstatement post-construction and to apply protection around the main entrance stone piers. This is to ensure that the gates do not get damaged by vehicles accessing the site during the construction to the various buildings within the grounds of Wormington Grange. Also due to the double blind corners on the main road and the narrow entrance of the metal gates this proposal aims to mitigate the health and safety concerns of trying to manoeuvre a large vehicle through the existing historic gates.
