Dear Mr Case,

Subject:- Trees protected under TPO/16/0914; Tree Surgery.

I am pleased to report that the tree surgery work approved by yourself on 11th November 2020 is now complete.

The crown thinning performed by tree surgeon Lloyd Southon to the Turkey oaks has successfully and sensitively maintained the shape of the trees, whilst reducing the 'sail area' and hence risk of further storm damage, as shown below.

Whilst on location here at Woodstock Barn, Mr Southon reviewed the risk of 'snap-outs' from our other trees in close proximity to our buildings and those of our neighbours.

From this review he has identified 5 other trees that pose a risk to the buildings. In order to mitigate our liability, to both our neighbours and ourselves, I am now therefore submitting a further request for permission to undertake crown reduction/thinning.

I hope you will review this request in the context of the responsible and restrained work we have undertaken to date, and given that this application has been carefully prepared to focus only on those trees that need work to avoid the risk of property damage.

I look forward to hearing from you whether our application is approved.

Yours sincerely,

Philip Chandler
