Dear Jonathan

**The Water Resources (Control of Pollution) (Silage, Slurry and Agricultural Fuel Oil) (England) Regulations 2010 – The ‘SSAFO Regulations’**

Further to our visit last Thursday

I can confirm that the Environment Agency supports the application for a grant under the Catchment Sensitive Farming Capital Grant Scheme to roof both the silage clamps that you showed us. The basis for the approval of the existing clamp is that the smaller clamp ( on the RHS as you look at the front of clamp) is not used for the storage of silage and any silage effluent leaking from the larger clamp can be contained in here.

---

If you have any queries please do not hesitate to contact me.

Kind regards

**Nicola Rumsey**

**Environment Officer**
