Attachments: Velux roof depth 1-100.pdf

Hi Thomas,

I sent you some further information last week, would you now be able to approve this application?

It is attached again, just incase you didn't receive it.

To confirm the Velux is designed with a depth above the joist of 120.6mm. The depth of the existing batton and tile is 75mm leaving 46.6mm of exposed Velux above the tile. Plan attached scale 1:100

Many thanks

Gina Reinge
