Dear Danielle

With regards to your email on the 26-7-21

the proposed building is North-West of the Naggar lodge mentioned and is not with in sight.

The proposed building would be used to house and rear the baby calves and the rear the older calves from our dairy herd at Cooksbridge

The farm extends to 80 hectares and supports 150 cattle of various ages and we have approx 80 calves per year and under our Milk Contract with Arla we have to have suitable housing,

Also to comply with the Red tractor farm.

Assurance Scheme we have to have similar standards
hope this answers your questions
