

I can straight forwardly recommend that these windows are condemned and replacements sought.

1. BEDROOM, 8 above 8, approx 1050(w) x 1350(H)
2. BATHROOM, 6 above 6, approx 850(w) x 1350(H)
3. STAIRWELL, 4 above 4, approx 750 x 1550(H)
4. BEDROOM, 6 above 6, approx 850 x 1350(H)
5. UTILITY, suggest 3 over 3, approx 880 x 750(H)
6. LARDER, suggest 6 over 6, approx 700 x 1000(H)

New windows can be made like you like in section sizes, mouldings and overall design but upgraded by using sustainably grown Hardwood (Sapele), discrete but very effective sargol stripping and by fully spray painting with a high specification Sikkens Joineery coating to 4 coats including special adhesion primer. Fitting would include hidden damp proof membranes and pointing in with Lime mortar.

If you require any further details clarified so please come back to me,
