REPORT ON CONDITION OF SLIDING SASH WINDOWS AT TEMPERANCE FARM CARBSHIELD

18 JUNE 2021

Following my visit, I can offer the following comments
on the 6 No. North Facing sliding sash windows

All of the windows are original except for the poorly maintained casement No. 5. All are in a poor state, none open and all are suffering significantly from wet rot, in particular the fixed frame cills and bottom of jambs and front linings. When windows like these are coated with many decades of past painting, the paint invariably hides additional rot. It is distinctly unwise to burn off the paint because of past lead residue so
