Good Afternoon,

We have been requested by Royal Mail to carry out the following works:

Site address; The Friaries St Nicholas Street, Bodmin, Cornwall, PL31 1AA

After Tree works Survey this quotation is to supply a NPTC Cert team to cut back branches in the top carpark from the Ash trees that are showing as dangerous due to ASH Dieback . The team will need full access to the carpark to make a safe working zone to be able to gain access to each area with the effected trees . The team will remove the branches as required . Chipping the waste on site . The main area is the entrance to the carpark & the top of the carpark . Some branches have snapped back or are ready to snap off . All green waste arisings will be chipped and removed from site .

We have noted that this address is within a conservation area. As we are carrying out minor works due to overhanging branches, can we have your approval that works will not require a submission of an application?

Kind Regards,

Laura Smith
