Dear Joe,

Further to my site visit at the above address I can confirm that Cut Above Tree Management Ltd. recommends the following tree work in the rear garden of the property above:

- T1 - Large Lime tree in middle of garden. Tree has grown quite large from its historical pollard points and is causing excessive shading, and also growing from weak unions. Pollard to historic pollard points.
- T2 - Large Lime tree on RHS of garden. Tree has grown quite large from its historical pollard points and is causing excessive shading, and also growing from weak unions. Pollard to historic pollard points.

If you need any further information, please feel free to contact me on my mobile at the bottom of this page.

I look forward to hearing from you.

Kind regards

Hamish Lodge
