Pictures 1 and 2 show the 10'x10' summerhouse with optional cedar shingle roof.

- Includes delivery in 10-12 weeks (or later if you wish)
- Prices fixed until Wednesday 8th September
- Free Toughened Glass

### Summary:

These superb quality high specification summerhouses are 6'x6' (1.8x1.8m), 7'x7' (2.1x2.1m), 8'x8' (2.4x2.4m), 10'x10' (3.0x3.0m) or 12'x12' (3.6x3.6m). Features include a choice of deal or cedar cladding. Quality features include a panoramic fully glazed design with double hinged doors and at least 2 front windows. The ridge height can be reduced to under 2.5 metres high to avoid planning restrictions. Options include decorative felt tiles and a cedar shingle roof. Instructions are supplied for self assembly.

- 12'x12' standard ridge height 10'9" (3277mm) ← Summerhouse 85 Andover Road

**GOOD QUALITY CONSTRUCTION:** A feature of these summerhouses is the doors, which have a mortice lock and come with black antique handles and hinges included as standard. The windows are also well made with joinery opening windows featuring morticed and tenoned joints. The glazing is glass retained with timber beading. Another feature is the substantial framing which ensures a more robust and durable building.

**LOW LEVEL GLAZING:** Low level glazing provides a panoramic view from inside your garden room so you can appreciate your garden fully. With low level glazing you can enjoy a better view of the garden, especially at sites where the garden slopes away.

**CORNER BUILDING SIZES:** For ease of reference these corner summerhouses are measured as a square based on the width of the two longest walls. The external wall sizes are listed alongside the price. These sizes do not include the roof overhang. Many other suppliers quote the overall roof size which is much larger.

**WE ARE PROUD TO DISPLAY A SIMILAR BUILDING:** You can see a similar building to this one on display at our show centre in Norwich. Although it is not exactly the same model, it is a similar building made in the same factory to a similar specification using the same components. The display will give you a good impression of the overall quality of construction. With thousands of buildings on our website and only a few dozen on display, we only display our best value buildings. We chose to display this building because it is one of our favourite buildings. We know it will bear close scrutiny. If you are able to visit us you will see the quality for yourself. Our Show Centre is open 7 days a week with expert advisors always available.
