

The Byre  
Milton Street  
Polegate  
East Sussex  
BN26 5RW

LIGHTING ASSESSMENT for EXTENSION to RESIDENTIAL CURTILAGE:

1. The proposed extension involves a small strip of land approx. 25.4m x 4.3m currently adjacent to the garden/amenity area to The Byre.
2. Part of the proposal involves the re-building of a collapsed field flint wall with brick dressings (see drawing No. 443.17A) with a pedestrian gate opening.
3. On either side of the re-built wall, it is proposed to install a single oblong outdoor recessed LED brick light in black die cast aluminium casing, mains voltage with a 5 watt Cool White light output and complete with a louvered face plate.
4. With the low output (5 watt LED) and louvered face plate, it is understood that no light pollution will arise as the light facility is purely to identify the gate position when approaching from either side.
