Dimensions should not be scaled from drawing all existing dimensions should be checked on site before commencement of the work. Any discrepancies in dimensions should be clarified with the Architect prior os commencement of the work. This drawing is to be read in conjunction with all the relevant Mechanical and Electrical drawings. This drawing is to be read in conjunction with the relevant Mechanical Electrical drawings. Client / contractor censure all agreements relating to 'the adving difference's and the contract. Client / contractor censure all agreements relating to 'the adving is to be read in conjunction with the relevant Structural Engineer's drawings. Client / contractor censure all agreements relating to 'the adving difference's and the contract. Client / contractor censure all agreements relating to 'the adving difference's are in place prior to commencement of works. This drawing is copyright and to be returned to the architect on completion of the contract. Health and Safety : Falls from height: Make sure ladders are in good condition, at a 1:4 angle and tied or footed. Prevent people and materials falling from rofs, gable ends. working platforms and open edges using guardrails, mid rais and toe boards. Make sure fragile roof surfaces are covered, or secure working platforms with guard rails are used on or below the roof. Collapse of excavations: Shore excavations; cover or barrier excavations to prevent people or vehicles from falling in. Collapse of structures (such as walls, beams, chinney breasts and roofs) with props; ensure props are installed by a competent person. Exposure to building dust: Frevent dust by using wet cutting and vacuum extraction or tools; use a vacuum cleaner rather than sweeping; use a suitable, well-fitting mask. Exposure to asbestos: Do not start work if it is suspected that asbestos may be present until a demolition/refurbishment survey has been carried out. Exposure to asbestos: Do not start work if it is suspected        |
