

Supporting evidence to show that the works to the bus stop is achievable and if there are any consents/agreements in place for this.

My Client Mr Williams had had a few anti social behaviours incidents at the bus stop so they had been in contact with Rob Plewes at Stirling Council trying to have it moved. After a thorough review, Rob Plewes advised them that the bus stop could not be moved from the property however if they did wish to move it to the other side of the existing drive (as in this current application), it would need to be by a formal planning application.

My client Mr Williams had also met with Graham Wilson on site in 2018 who measured the stop and said he thought it was achievable.
