

Bike-S Street 6

Cycle Storage Modules

Unit shown is metroSTOR Bike-S Street 6 Cycle Storage Module
Standard Specification - 6no. Cycles

metroSTOR BIKE-S Street are a low-profile design with a maximum height of 1485mm for reduced visual impact and the maintenance of clear sightlines. The 2000mm module depth enables positioning within standard car parking bays. Two models are available with storage capacity for 6 or 12 cycles.

metroSTOR Bike-S is the new 'on-street' secure cycle storage module from metroSTOR, bringing style, ease of use and durability to the street scene. Access control options include app-based, electronic fob, mechanical keypad and key operated systems enabling BIKE-S module entry to be limited to paying or authorised users.

Modules are designed to fit within standard car parking spaces with full height and low profile models available. Integral, stepped cycle trays and welded security locking points at the front of the store makes loading and securing cycles easy.

The all-steel construction of BIKE-S is designed for security with the cladding panels manufactured from heavy gauge steel and fitted to fully-welded frames with an innovative interlocking design that has no external fixings. All bolted internal frame and ground fixings have shear type security fixings.

The unique slot pattern vision panels ensure clear lines of sight are maintained through the store for personal security. Plain panels can be specified as a no cost option. Access doors are locked using a Kitemarked 3-Star Eurocylinder with external anti-drill plates. Both doors are fitted with internal closing cylinders to prevent the store being left unsecured.

BIKE-S external design incorporates vertical signage and brand panels to both sides of the store that can be customised with specific laser cut designs. Further options include LED backlighting to signage panel, internal LED lighting, solar powered lighting and a lightweight sedum green roof.

metroSTOR Steet 6 Dimensions

(A)	Roof Depth:	2110mm
(B)	Base Depth:	2100mm
(C)	Roof Width:	2109mm
(D)	Base Width:	2100mm
