APPENDICES

- Appendix A Asbestos Disposal WTN's and Consignment Notes**
- Appendix B Environmental Permits and Licenses**
- Appendix C Bulk Excavation WTN**
- Appendix D Validation Testing Results**
- Appendix E Imported Topsoil Details**

1.1 INTRODUCTION

The following information provides details of the validation testing and reporting which was carried out as part of the Brighton 3T's development, and the remedial measure necessary to deal with any contamination identified on site. It also provides information on the methodology used to address the risk from found contamination and the lines of evidence are provided to establish that the contamination has been dealt with correctly to address the Planning Condition 20 (ii).

1.2 BACKGROUND

Laing O'Rourke Construction Ltd (LOR) is the Principle Contractor to build Brighton 3T's Hospital.

As part of the development works, a desk study, ground investigation and subsequent interpretative report were completed to examine geo-environmental and geotechnical risks associated with the site and obtain information on the geo-environmental and geotechnical nature of the ground conditions in relation to the proposed development.

Details of these investigation works are provided in the following document, which should be read in conjunction with this document

- WSP (Jan 2011), Brighton 3Ts – PHASE II GEO-ENVIRONMENTAL ASSESSMENT, WSP-EV-SW-RP-0031F02
- LOR, Brighton 3T's – Contamination Management Plan, LOR-EV-SW-PL-001 R01
- Brighton & Hove City Council, BH2016/01437 Environmental Health response to LOR- EV-SW-PL-001 R01
- LOR, Brighton 3T's – BH2011/02886 PC 020 – Stage 1 - Contamination

The above report identified that there was no ground or gas risk at the site but highlighted a procedure for any contaminated ground which was found on site and validation of any materials imported onto site. Planning Condition 20(i) was discharged by BHCC on 4th October 2016.

1.3 SCOPE

The purpose of this document is to demonstrate that the requirements of the Contamination Management Plan were complied with and the issues outlined in the Planning Condition have been met. The Planning Condition 20 states that:

Planning Condition 20:

No works shall take place on the Stage 1 development site (save for the helipad and substation) until a detailed scheme for remedial works and measures to be undertaken to avoid risk from contaminants and/or gases when the site is developed and proposals for future maintenance and monitoring has been submitted to and approved in writing by the Local Planning Authority.

The scheme shall be implemented fully in accordance with the approved details.(ii) A competent person shall be nominated to oversee the implementation of the works required by (i).

The Stage 1 development (save for the helipad and substation) hereby permitted shall not be occupied or brought into use until there has been submitted to the Local Planning Authority verification by the nominated competent person that any remediation undertaken on site for each stage has been fully implemented Such verification for each phase shall comprise:

- a) built drawings of the implemented scheme;*
- b) photographs of the remediation works in progress;*
- c) certificates demonstrating that imported and/or material left in situ in accordance with details agreed as part of (i) above.*

Thereafter the scheme shall be monitored and maintained in accordance with the scheme approved under (i).

As part of the Contamination Management Plan produced by Laing O'Rourke the main area of concern on the site was the locations of asbestos cement sheeting which had been found in the near surface ground from demolition works which had previously been carried out on the site. Details of the disposal of this material by specialist contractors will be provided in this report.

Details of the bulk excavation and disposal of material will also be provided together with details of the recipient sites for the material.

Copies of all contamination testing undertaken as part of these works will also be included.

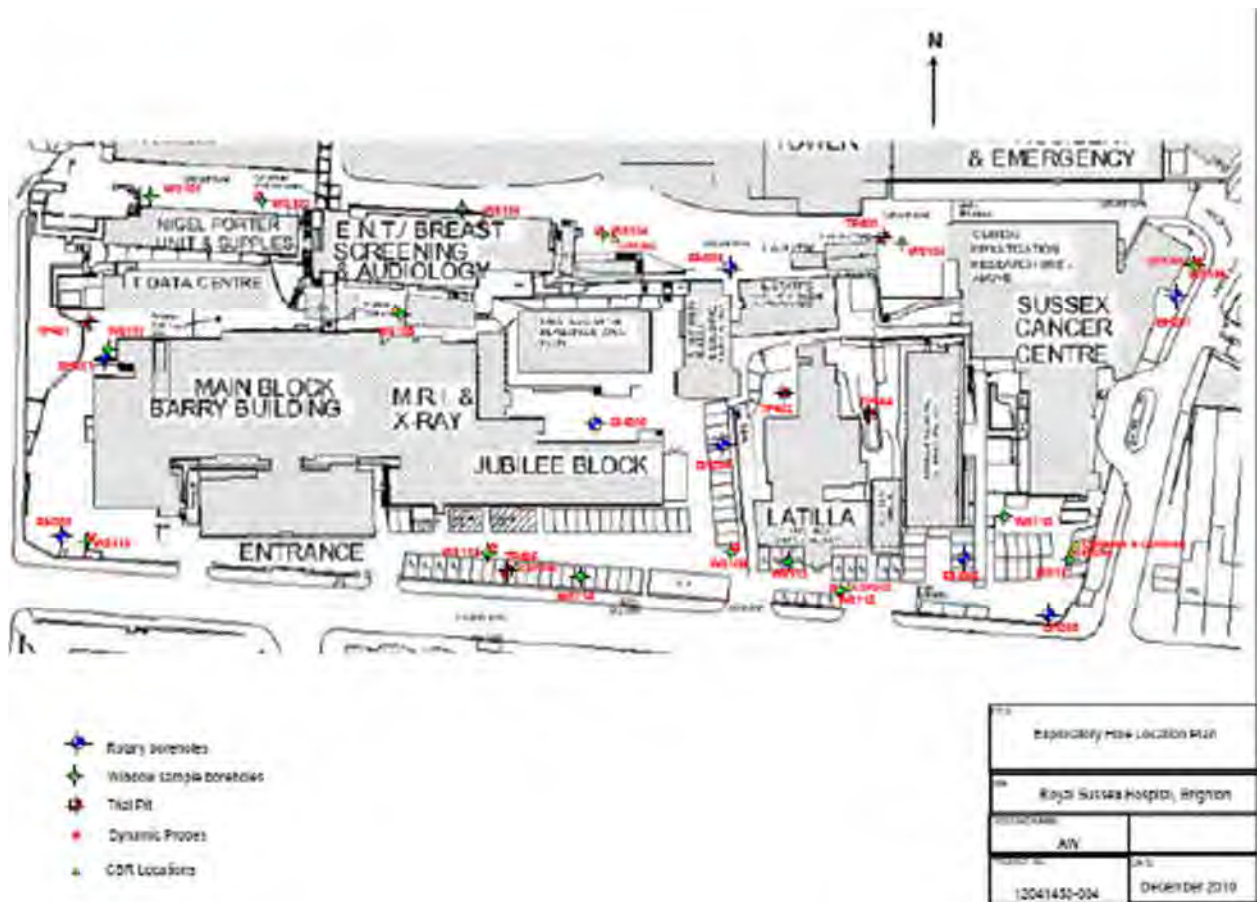

At the time of writing the soft landscaping works had not been completed at the site. Testing and validation of the imported Topsoil will be included as a revision to this report.

2.0 Validation of Construction Works

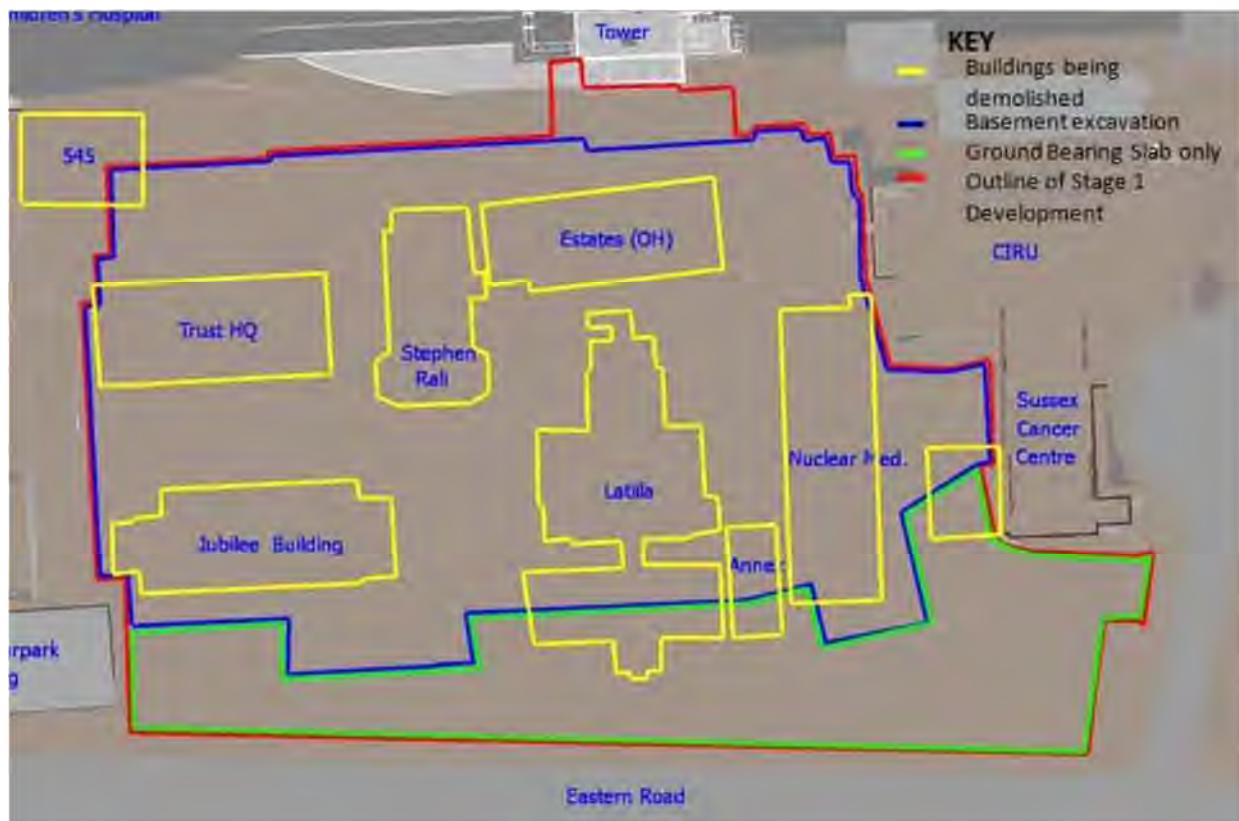

Details of the general requirements for the ground works are provided in the following sections below.

2.1 Asbestos Contaminated Ground

Asbestos was identified in two location following the site investigation carried out in 2010 with additional trial pit work carried out by LOR in 2016. The layout of the site and the 2010 borehole locations are shown on the plan below.

The asbestos was located in the area of the Barry/Latilla Buildings and under the Car Park to the South of the Sussex Cancer Centre. As illustrated below, whilst the Barry/Latilla Buildings were to be demolished and formed part main bulk excavation area, the Car Park area was outside the main bulk excavation area. It was also a critical location for site logistics. It was decided that the Asbestos would not be removed from underneath the Car Park area until after the main basement excavation was completed.

H Smith were employed to undertake the demolition of the Barry and Latilla buildings. During the demolition works it became evident that there were a significant number of below ground ducts which were lagged with fibrous asbestos. A significant amount of cross contamination into the surrounding soil had occurred. Much appeared to have been caused by maintenance and repair works which had been carried out since the buildings had been originally constructed. Areas of below ground asbestos contamination are summarised on the drawing below. An estimated 630m³ of ground was thought to be impacted.

H Smiths demolition contract was extended to remove the below ground asbestos. H Smith utilized the Haulier, Matthews (Sussex) Ltd and the materials were deposited in the SNRHW Asbestos Mono-cell at Biffa's Redhill Landfill. Details of the licenses and permits are included in Appendix B. Copies of Waste Transfer Notes, Hazardous Consignment Tickets and Weighbridge tickets are included in Appendix A. Between July and September 2017 a total of 55 loads of asbestos contaminated soil was removed by H Smith, totaling 704T. Validation testing was completed to demonstrate that the asbestos had been removed prior to disposal of the underlying ground.

Following completion of the main bulk excavation the asbestos underneath the Car Park needed to be dealt with. A further 4 trial pits were carried out to determine the presence and concentration of asbestos. Samples were taken within the Made Ground and underlying Chalk. Testing showed that the asbestos was only present in the Made Ground. Trial pit locations and test results are included in Appendix D.

Robore were contracted to remove the material. As Robore are not a licensed asbestos contractor, they contracted Windsor Waste Management to remove the material. The asbestos contaminated soil was transported by G Webb to the Duntons waste treatment facility in the West Midlands. Copies of the relevant documentation is included in Appendix A. In May 2019 29 loads of material were transported to Duntons totaling 548T. The works were overseen by Pennington Choices Ltd who carried out air monitoring whilst the works was being carried out and provided a visual inspection to confirm all of the Made Ground had been removed.

2.2 Materials Management (Disposal)

There was no opportunity to reuse any of the excavated material on site, due to the size of the basement and the limits of the site boundary. P J Brown Ltd were employed to remove the excavated materials and a breakdown of the material types and total volumes is given below:

Material	Volume (m3)
Concrete	1,496
Tarmac	128
Soil and Stones	79,152

A total of 80,776m³ of material was removed. Where ever possible the material was taken for recycling or for use on restoration projects to minimize the material going to landfill. A list of the necessary environmental permits and waste carriers licenses are included in Appendix B and a list of the waste transfer notes are included in Appendix C, along with physical copies of representative WTN's. Copies of the documents listed in Appendix B and C can be provided if required.

No contamination other than the Asbestos detailed above was found on site.

2.3 Validation Testing

Testing was carried out at various stages through out the project to confirm the waste classification of the material being removed and to demonstrate that any contamination identified had been removed. A list of samples taken in 2017 is given in the table below, including the ground level at the location where the sample was taken and the depth the sample was taken. All testing was carried out at Concept Life Science's laboratory in Braintree. CLS are UKAS and MCERTS accredited. All results are included in Appendix D.

Although some muck away occurred in 2016 the main bulk dig commenced in 2017. Initial waste classification was completed based on the WSP site investigation, however, in April 2017, prior to commencement of the bulk dig a series of 11 samples were taken and tested across the site in order to confirm our Duty of Care and the correct Waste Classification. All samples were taken by the Project Environmental Manager and photographs of the typical sampling trial pits are given above. All sample locations are include on plans included in Appendix D.

Sample	Date Taken	Depth (m)	Level (mD)
17/001	12/04/2017	0.0	48.696
17/002	12/04/2017	0.0	48.932

17/026	17/08/2017	0.5	36.244
17/027	17/08/2017	0.5	39.808
17/028	17/08/2017	0.5	41.15
17/029	17/08/2017	0.5	40.655
17/030	17/08/2017	0.5	40.087
17/031	17/08/2017	0.5	41.131
17/032	17/08/2017	0.5	44.275
17/033	17/08/2017	0.5	44.831
17/034	17/08/2017	0.5	46.489
17/035	17/08/2017	0.5	40.569

An area of contamination had been identified in the WSP report beneath the Car Park area and in May 2017 5 samples were taken in that area to confirm the presence of this contamination. High levels of hydrocarbons were found in samples 17/020 and 021 where the samples were taken in the Made Ground. The other 3 samples were taken in the Chalk and were found to be Inert.

A further 9 samples were then taken across the site in August 2017, during the bulk dig to confirm the waste classification.

In March 2019 prior to the excavation of the Car Park area a further 6 samples were taken. The samples confirmed the presence of Hydrocarbons and low levels of asbestos within the Made Ground. The details of the disposal of this material is given in earlier sections of this report. Samples identified with "C" were taken in the Chalk and demonstrated that once the Made Ground was removed the underlying natural ground was uncontaminated and Inert.

2.4 Imported Top Soil

The soft landscaping for this project has not yet been completed. The validation of any imported Top Soil required for the soft landscaping will be detailed in a revision to this document when it is completed

3.0 Conclusion

This report has been produced to provide validation that the objectives of the Contamination Management Plan were followed. Validation was required in three areas:

- Asbestos impacted ground: two areas of asbestos impacted ground had been identified. This material was removed by Licensed waste contractors and disposed of at suitably permitted facilities. Excavation and disposal of this material was overseen by suitably licensed consultants Pennington Choice.
- Bulk excavation was undertaken by PJ Brown to suitable restoration and recycling facilities for reuse. Waste classification testing was undertaken to ensure that the material went to the correctly permitted sites.
- Topsoil Import: Soft landscaping has yet to be completed on the project and any imported topsoil will be subject to Validation Testing and this will be included in a subsequent revision of this report.

The above demonstrates that the Remediation Strategy has been complied with and that Planning Condition 20(ii) should be discharged.

The Hazardous Waste Regulations 2005: Consignment Note

Environment Agency
CARRIER'S COPY

PART A Notification details

1 Consignment note code: HSMITH/001

2 The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):
Royal Sussex Hospital
Eastern Road,
Brighton BN2 5BE

3 The waste will be taken to (name, address and postcode):
Biffa, Redhill
Redhill, RH1 4ER

4 The waste producer was (if different from 2) (name, address, postcode, telephone, e-mail, facsimile):
as part A12

PART B Description of the waste

If continuation sheet used, tick here

1 The process giving rise to the waste(s) was: Excavation 2 SIC (2007) for the process giving rise to the waste: 41.20/1

3 WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of waste	List of wastes (EWC code)(6 digits)	Quantity (kg)	The chemical/biological components in the waste and their concentrations are:		Physical form (gas, liquid, solid, powder, sludge or mixed)	Hazard code(s)	Container type, number and size
			Component	Concentration (% or mg/kg)			
<u>as dug / Soil mixed / Hard core</u>	<u>17 01 06</u>		<u>arsenate</u>	<u>0.1%</u>	<u>soil</u>	<u>HP7</u>	
			<u>arsenate</u>

The Hazardous Waste Regulations 2005: Consignment Note

CARRIER'S COPY

PART A Notification details

1. Consignment note code: **HSmith/012**

2. The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):
**Royal Sussex Hospital,
 Eastern Road
 Brighton BN2 5BE**

3. The waste will be taken to (name, address and postcode):
**Biiffa, redhill landfill
 redhill, RH1 4ER**

4. The waste producer (name, address, postcode, telephone, e-mail, facsimile):
as part A12

PART B Description of the waste

If continuation sheet used, tick here

1. The process giving rise to the waste (e.g. was: **Excavation** 2. SIC (2007) for the process giving rise to the waste: **41.201**

3. WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of waste	EWC code(s) (6 digit)	Quantity (kg)	The chemical, biological components of the waste and their concentrations are:		Physical form (gas, liquid, solid, powder, sludge or paste)	Hazard code(s)	Container type, number and size
			Component	Concentration (fraction/kg)			
as dug soil							
mixed Hard Core	17 01 06		chromite	0.1%	solid	HP7	
			chromite				

The information given below is to be completed for each EWC identified

EWC code	UN identification number(s)	Proper shipping name(s)	UN class(es)	Packing group	Special handling requirements

PART C Carrier's certificate

PART D Consignor's certificate

(If more than one carrier is used, please attach schedule for subsequent carriers. If schedule of carriers is attached tick here)

I certify that I today collected the consignment and that the details in A2, A3 and B3 are correct and I have been advised of any specific handling requirements.

Where this note comprises part of a multiple collection the round number and collection number are:

1. Carrier name
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):
MATTENS (SUSSEX) LTD.

2. Carrier registration no./reason for exemption: **CB D1147665**

3. Vehicle registration no. (or mode of transport, if not road): **PN55ULF**

Signature: **[Signature]**
 Date: **14.07.2017** Time: **11:30**

I certify that the information in A, B and C has been completed and is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged and labeled correctly and the carrier has been advised of any specific handling requirements.

I confirm that I have fulfilled my duty to apply the waste hierarchy as required by Regulation 12 of the Waste (England and Wales) Regulations 2011:

1. Consignor name: **J. DANCE**
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):

**H. Smith Engineers
 Priory Road
 Dorking DA1 2BJ**

Signature: **[Signature]**
 Date: **17/7/17** Time: **11:30**

PART E Consignee's certificate (where more than one waste type is collected all of the information given below must be completed for each EWC)

Individual EWC code(s) received	Quantity of each EWC code received (kg)	EWC code accepted/rejected	Waste management operation (R or D code)
17 01 06	12660	A CC	DOS

1. I received this waste at the address given in A1 on: Date: **17-7-17** Time: **14:36**

2. My vehicle registration no. (or mode of transport, if not road): **PN55ULF** Name: **[Name]**
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):

I certify that waste being (R, exempt) or (D) or (R or D) number:

authorises the management of the waste described in B at the address given in A3.

Where this consignment forms part of a multiple collection, as set out in Part C, I certify that the details of the consignment's firm giving rise to it are:

The Hazardous Waste Regulations 2005: Consignment Note

Environment Agency
CARRIER'S COPY

PART A Notification details

1. Consignment note code: **H Smith/009**

2. The waste described below is to be removed from (name, address, postcode, telephone, email, facsimile)
**Royal Sussex Hospital,
Eastern Road,
Brighton BN2 5BE**

3. The waste will be taken to (name, address and postcode)
**Biffa, Redhill Landfill,
Redhill, RH1 4ER**

4. The waste producer will (if different from 2) (name, address, postcode, telephone, email, facsimile)
as part A12

PART B Description of the waste

If continuation sheet used, tick here

1. The process giving rise to the waste's was: **Excavation** 2. SIC (2007) for the process giving rise to the waste: **41.201**

3. WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of waste	List of wastes (EWC codes) (6 digits)	Quantity (kg)	The chemical/biological components in the waste and their concentrations are:		Physical form (gas, liquid, solid, powder, sludge or mixed)	Hazard code	Container type, number and size
			Component	Concentration (as mg/kg)			
as dug / soil mixed / Hard Core	17 01 06		Chrostite	0.1%	Solid	HP 7	
			amoste				

The information given below is to be completed for each EWC identified

EWC codes	UN identification numbers	Proper shipping name(s)	UN classes	Packing groups	Special handling requirements

PART C Carrier's certificate

PART D Consignor's certificate

(If more than one carrier is used, please attach schedule for subsequent carriers. If schedule of carriers is attached tick here.)

I certify that I today collected the consignment and that the details in A2, A3 and B3 are correct and I have been advised of any specific handling requirements.

Where this note comprises part of a multiple collection the round number and collection number are:

1

1. Carrier name
On behalf of (name, address, postcode, telephone, email, facsimile):
MATTENS (SUSSEX) LTD.

2. Carrier registration no./class of exemption: **CB D4147665**

3. Vehicle registration no./mode of transport, if not road: **CUS6 BUX**

Signature:

Date: **17/7/17** Time: **0800**

I certify that the information in A, B and C has been completed and is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged and labeled correctly and the carrier has been advised of any specific handling requirements.

I confirm that I have fulfilled my duty to apply the waste hierarchy as required by Regulation 12 of the Waste (England and Wales) Regulations 2011.

1. Consignor name: **Jounce**

On behalf of (name, address, postcode, telephone, email, facsimile):

**H Smith Engineers
Pruby road
Dorking DA1 2BJ**

Signature:

Date: **17/7/17** Time: **0800**

PART E Consignee's certificate (where more than one waste type is collected all of the information given below must be completed for each EWC)

Individual EWC waste received	Quantity of each EWC (code received) (kg)	EWC code accepted/received	Waste management operation (R or D code)
17 01 06	12160	A11	D05

1. Where this is the waste arrival address (given in A3 on): Date: **17-7-17** Time: **0716**

2. Vehicle registration no./mode of transport, if not road:

3. Where this is the true business name (details): **CUS6 BUX**

Identify any waste being exempt (waste operation number):
B5 F126 IT

a. Who uses the management of the waste described in B at the address given in A3?

Where this note comprises part of a multiple collection, the identification number, I certify that the total number of consignments forming the collection are:

The Hazardous Waste Regulations 2005: Consignment Note

Environment Agency

CARRIER'S COPY

PART A Notification details

- 1 Consignment note code: **ASmith/02809**
- 2 The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):
**Royal Sussex Hospital,
 Euston Road
 Brighton BN2 5BE**
- 3 The waste will be taken to (name, address and postcode):
**B.ffa, redhill landfill
 redhill, RH1 4ER**
- 4 The waste producer was (if different from 2) (name, address, postcode, telephone, e-mail, facsimile):
as part A12

PART B Description of the waste

If continuation sheet used, tick here

- 1 The process giving rise to the waste(s) was: **Excavation** 2 SIC (2007) for the process giving rise to the waste: **41.2011**
- 3 WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified):

Description of waste	List of wastes (EWC code)(6 digits)	Quantity (kg)	The chemical/biological components in the waste and their concentrations are:		Physical form: (gas, liquid, solid, powder, sludge or mixed)	Hazard code(s)	Container type, number and size
			Component	Concentration (% or mg/kg)			
as dug / soil							
minerals / Hard Core	170106		chrostone	0.1%	solid	H17	
Core			amosite				

The information given below is to be completed for each EWC identified

EWC code	UN identification number(s)	Proper shipping name(s)	UN class(es)	Packing group(s)	Special handling requirements

PART C Carrier's certificate

PART D Consignor's certificate

(If more than one carrier is used, please attach schedule for subsequent carriers. If schedule of carriers is attached tick here:)

I certify that I today collected the consignment and that the details in A2, A3 and B3 are correct and I have been advised of any specific handling requirements

Where this note comprises part of a multiple collection the round number and collection number are:

Round number: Collection number:

- 1 Carrier name:
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):
MATTENS (SUSSEX) LTD.
- 2 Carrier registration no /reason for exemption: **CB04147665**
- 3 Vehicle registration no. / mode of transport, if not road: **P051 ULF**
- Signature: **[Signature]**

I certify that the information in A, B and C has been completed and is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged and labelled correctly and the carrier has been advised of any special handling requirements.

I confirm that I have fulfilled my duty to apply the waste hierarchy as required by Regulation 12 of the Waste (England and Wales) Regulations 2011.

- 1 Consignor name:
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):
**H. Smith Engineers
 Priddy Road
 Dorking DA1 2BJ**
- Signature: **[Signature]**

Date: **28-7-17** Time: **09:00**

Date: **28-7-17** Time: **09:00**

PART E Consignee's certificate (where more than one waste type is collected all of the information given below must be completed for each EWC)

Individual EWC code(s) received	Quantity of each EWC code received (kg)	EWC code accepted/rejected	Waste management operation (R or D code)
170106	141.00	A10	D05

1 I received this waste at the address given in A3 on Date: **28-7-17** Time: **09:16**

2 Vehicle registration no. (or mode of transport if not road): **P051 ULF**

3 Where waste is rejected, please provide details: **[Blank]**

Name:
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):

**WPA WASTE SERVICES
 CONNINGERS LANE
 REDHILL
 SURREY RH1 4ER**

I certify that waste producer's exempt waste operation number:

[Signature]

authorises the management of the waste described in B at the address given in A3.

Where the consignment forms part of a multiple collection, as identified in Part C, I certify that the total number of consignments forming the collection are:

Signature: **[Signature]**

Date: **28-7-17** Time: **09:16**

The Hazardous Waste Regulations 2005: Consignment Note

Environment Agency

CARRIER'S COPY

PART A Notification details

1 Consignment note code: **HSmith/048xt**

2 The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):
**Royal Sussex Hospital
 Eastern Road
 Brighton, BN2 5BE**

3 The waste will be taken to (name, address and postcode):
**Biffa, Redhill Landfill,
 Redhill, RH1 4ER**

4 The waste producer was (if different from 2) (name, address, postcode, telephone, e-mail, facsimile):
on Part A12

PART B Description of the waste

If continuation sheet used, tick here

1 The process giving rise to the waste(s) was: **Excavation** 2 SIC (2007) for the process giving rise to the waste: **41.2J**

3 WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of waste	List of wastes (EWC code)(6 digits)	Quantity (kg)	The chemical/biological components in the waste and their concentrations are:		Physical form (gas, liquid, solid, powder, sludge or mixed)	Hazard code(s)	Container type, number and size
			Component	Concentration (% or mg/kg)			
as dug Soil							
metal Hdd	170106		crustale	0.190		H P7	
Core			emulsi				

The information given below is to be completed for each EWC identified

EWC code	UN identification number(s)	Proper shipping name(s)	UN class(es)	Packing group(s)	Special handling requirements

PART C Carrier's certificate

PART D Consignor's certificate

(If more than one carrier is used, please attach schedule for subsequent carriers. If schedule of carriers is attached tick here.)

I certify that I today collected the consignment and that the details in A2, A3 and B3 are correct and I have been advised of any specific handling requirements.

Where this note comprises part of a multiple collection the round number and collection number are:

1

1 Carrier name:
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):
Matthews (Sussex) LTD

2 Carrier registration no./reason for exemption: **CBDY 147 665**

3 Vehicle registration no. (or mode of transport, if not road):

Signature **[Signature]** **CUS6BGX**
 Date **24.8.12** Time **1245**

I certify that the information in A, B and C has been completed and is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged and labelled correctly and the carrier has been advised of any special handling requirements.

I confirm that I have fulfilled my duty to apply the waste hierarchy as required by Regulation 12 of the Waste (England and Wales) Regulations 2011.

1 Consignor name: **J. DANCE**
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):
**H Smith Engineers,
 Priory Road,
 Dartford, DA1 2BT**

Signature _____
 Date _____ Time _____

PART E Consignee's certificate (where more than one waste type is collected all of the information given below must be completed for each EWC)

Individual EWC code(s) received	Quantity of each EWC code received (kg)	EWC code accepted/rejected	Waste management operation (R or D code)
170106	11440	A 2	DOS

1 I received this waste at the address given in A3 on **24-8-12** Time **1315**

2 Vehicle registration no. (or mode of transport if not road): **CU 56BGX**

3 Where waste is rejected please provide details:

Name: **L. Smith**
 On behalf of (name, address, postcode, telephone, e-mail, facsimile):

I certify that **as a permit/exempt waste** (insert a number):
BV 8126TX
 authorises the management of the waste described in B3 at the address given in A3

Where the consignment forms part of a multiple collection, as identified in Part C, I certify that the total number of consignments forming the collection are:

Signature **[Signature]**
 Date **24-8-12** Time **1315**
