north

notes in relation to Regulations 13,14 & 15
Protective works:

The entire site boundary (highlighted in RED), is to be enclosed with a secure herras fence (2000mm high) This will not encroach on the public footpath.
There will be one place of entry to the site, this will be secure gated entrance at the roundabout.
No person shall enter the site before a full induction of site safety and protocol is completed.
Contractor to ensure that the surrounding footpaths are kept free from debris at all times
A professional security company has been employed to look after the security of the site. There will also be a guard on site from 5pm till 1am every workday and 9am till 1am at the weekends.
