**Subject:** RE: Lodge Farm.

Good afternoon Alvan

Commenting on the p[oints raised in your email 12<sup>th</sup> October 2021.

1 There is a window to the study 1200mm wide x 1050 high

2 I have removed the soakaway in question ( it would not fit in where I had thought to close to the site boundaries and the root system of the Redwood)

3 Yes the crowns of both the Redwood and the Lime are a fair representative of how they are. The Lime tree was pollarded

4 The pathway through the two trees will have a no-dig method of construction. Indicated on final drawing.

Thanks for your help

Kind regards

Peter
