

Wendover Cricket Club

Access Feasibility

Client:	Agripower Ltd	Job No	J325951
Date:	01 September 2021	Approved by:	MF
Prepared by:	CS		

1. Introduction

1.1 Overview

1.1.1 This Technical Note (TN) has been prepared by mode transport planning (mode) on behalf of Agripower Ltd to consider the proposed access arrangement to the relocated Wendover Cricket Club on the B4009 Tring Road.

1.1.2 Wendover Cricket Club is currently located next to Wendover railway station and as a result of HS2, the cricket club will be required to relocate to a new premises. The existing and proposed new location of the cricket club is illustrated in **Figure 1.1**.

Figure 1.1 Site Location

2. Existing Conditions

2.1 Local Highway Network

- 2.1.1 The B4009 Tring Road is a two-way single carriageway road subject to a 30mph speed limit in the vicinity of the proposed site. Close to the site, Tring Road provides access to Wendover Heights Veterinary Centre and Halton Service Station via dropped kerb crossovers as well as the residential area of Halton Camp via Tring Road and Babington Road.
- 2.1.2 Along the site frontage, there are bus stops located on both sides of the carriageway, provided in laybys. These are served by Route 50 which operates on a half hourly frequency Monday – Saturday with no services on Sunday.
- 2.1.3 Footways along the site frontage on Tring Road are c. 1.5m-1.6m wide, set back from the main carriageway by a c. 2.5m grass verge. The footway along the southbound side of Tring Road is designated as a shared footway/cycleway.
- 2.1.4 The site is currently accessed from a dropped kerb crossover via a field gate. The dropped kerb crossover is shared with the neighbouring Wendover Heights Veterinary Centre.

3. Access Arrangements

- 3.1.1 It is proposed that the relocated cricket club will be accessed from Tring Road via the creation of a new give-way priority junction.
- 3.1.2 The proposed access will serve entry and exit movements to the car park for cricket club. The new access will be located circa. 120m north from the B4009 Tring Road / Tring Road roundabout and circa. 80m south from the existing access to Wendover Heights Veterinary Centre access.
- 3.1.3 The proposed location of the access provides adequate junction spacing in line with the guidance outlined in Manual for Streets (MfS) which states a 60m spacing between side roads on the same side of the road and 30m between side roads on opposite sides of the road.
- 3.1.4 The proposed access arrangement is illustrated in [mode drawing 32-5951-003A](#), included as [Appendix A](#), which will be constructed to a width of 4.8m with 6m kerb radii. The north kerb radius of the access would tie in with the existing kerb line of the bus stop, which would be located immediately north of the proposed access. It is considered that buses accessing the stop could make use of the access whilst pulling into the bus stop layby in this location.

- 3.1.5 Manual for Streets (MfS) provides detailed guidance on street geometry which identifies that a carriageway of 4.8m wide is suitable for two cars to comfortably pass one another as well as for an HGV to pass a car. This is considered to be suitable to support the demand generated by the cricket club.
- 3.1.6 The geometries of the proposed access will also support the manoeuvring requirements for larger vehicles requiring access for servicing and delivery purposes i.e., refuse vehicles, which would take place infrequently.
- 3.1.7 The location and design of the proposed site access can accommodate requisite visibility splays in accordance with observed speeds on Tring Road which is detailed in [Section 3.2](#).

3.2 Visibility Splays

3.2.1 To determine the operation of the B4009 Tring Road, an Automatic Traffic Counter (ATC) survey has been undertaken between Thursday 10th June and Wednesday 16th June 2021 which provides both classified and volumetric traffic data along with vehicle speeds over a consecutive 7-day period. The ATC was installed on Tring Road in the vicinity of the location of the proposed access and a copy of the data is included as [Appendix B](#). The results of the ATC survey are summarised in [Table 3.1](#).

Table 3.1 B4009 Tring Road – Traffic Flows and Vehicle Speeds

Direction	Weekday Daily Average	Weekend Daily Average	Average Speed (mph)	85 th Percentile Speed (mph)
Northbound	5158	3581	33.0	38.4
Southbound	4956	3437	32.2	38.3

- 3.2.2 The required visibility splays have been based on Design Manual for Roads and Bridges (DMRB) criteria utilising the formula set out within Manual for Streets 2 (MfS2), given the 85th percentile speeds recorded on Tring Road. Visibility splays of 2.4m x 96.4m to the south and 2.4m x 95.6m to the north of the access would represent the required sightlines.
- 3.2.3 In accordance with the new DMRB guidance, no dry weather adjustment has been made due to the dry weather during the period of the ATC survey.
- 3.2.4 [mode drawings 32-5951-003A and 004](#), included as [Appendix A](#), illustrate that these visibility splays in both the horizontal and vertical alignments are achievable.
- 3.2.5 Furthermore, any vegetation along the visibility splays will be maintained a maximum height of 0.6 to accord with MfS principles.

4. Summary

4.1.1 This Technical Note (TN) has been prepared to consider the proposed access arrangement to the relocated Wendover Cricket Club on the B4009 Tring Road. In summary this TN has demonstrated that:

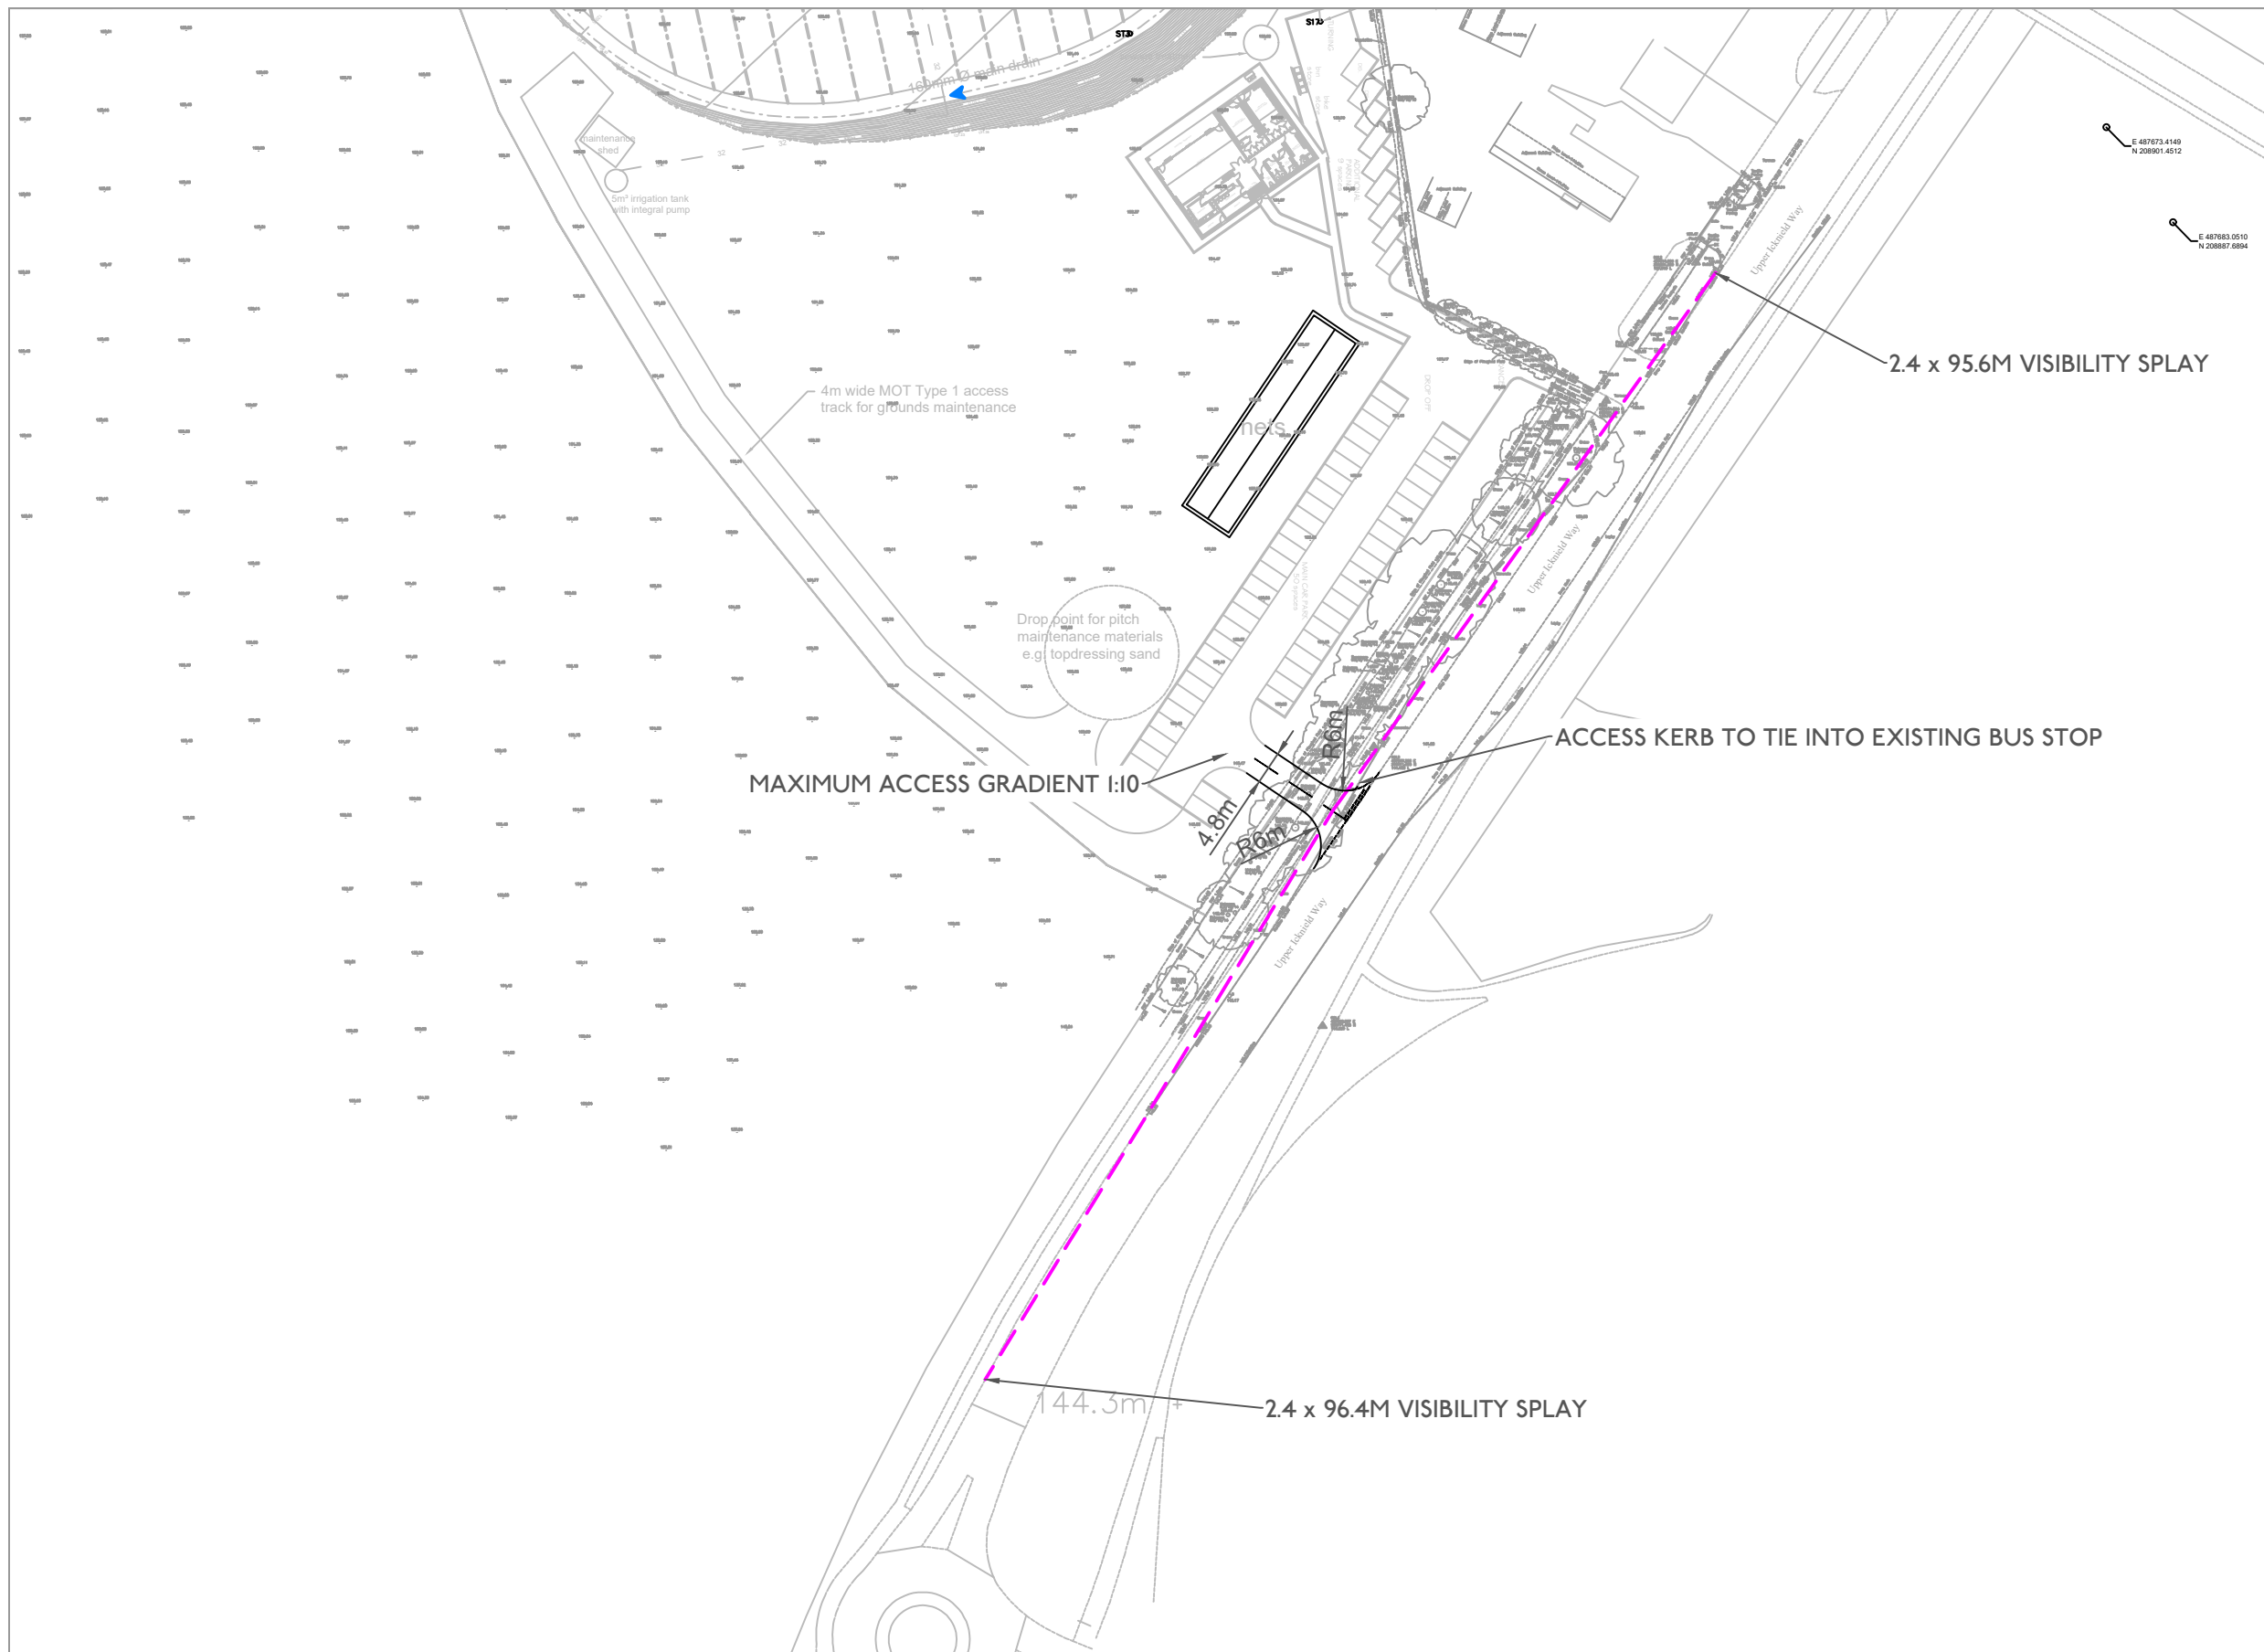

- The proposed arrangement is design compliant with MfS and DMRB guidance.
- Visibility splays, in accordance with 85th percentile speeds, are achievable from the proposed access on both the horizontal and vertical planes.
- The positioning of the access provides adequate junction spacing with existing access points and side roads.
- The geometries of the proposed access would support the expected vehicular demand generated by the cricket club.

APPENDICES

APPENDIX A

Proposed Site Access & Visibility Splays

This drawing has been produced by mode transport planning. No responsibility will be accepted for the use of this drawing in any other project. Visibility splays based on speed survey results and DMRB guidance. Due to observed weather conditions, no dry weather adjustment has been made to vehicle speeds.
