Bi fold Door Example

Ultra-slim sightlines
Compact, lightweight and made using premium grade aluminium - all the Ultra-Line 120 offers a slender alternative guaranteed to modernise your property.

Achieving a sightline of just 60mm, the Ultra-Line 120 offers a range of the smallest window solutions with a maximum of up to 80 panes. These ultra-slim windows mean less frame and more natural light in well-lit interior spaces. Available in either a standard or fixed window the Ultra-Line 120 is ideal for spaces where maximizing glass area and light is essential.

Why aluminium is the first choice for replacement windows
The Ultra-Line 120 also comes with low-noise options, double or triple glazing, and ultra-thin handles, giving you a window that suits not only your personal style, but your budget, too.
