To whom it may concern,

The reasons I would like approved planning for my utility shed is as follows:

The shed was put up for the water pump and filter system to be housed. This was done when the borehole was dug. This is necessary in order for the elements to be kept off the working parts which are electrical.

The shed is located away from site of road and blends in neatly with the surroundings.

The 4 water tanks and electrical wiring are housed in there which is essentially the factory for the pump as the water goes through each tank, is filtered and stored until the taps are used etc.

Thankyou
