

7th November 2017

Dear Sir / Madam

Planning Application for Air Source Heating at Crowfield Village Hall

The Village Hall Management Committee would like to install a new Air to Air Heat Source heating system for Crowfield Village Hall. This will require the installation of two external condenser units which we are planning to install on the roof of the kitchen and will alter the front elevation to the building.

We have considered the position of the units and to reduce the risk of criminal or children with sticks damaging them and would like to install them on the roof of the kitchen. These units will be below the roof line of the main hall which will also lower the noise breakout behind the units.

The Daikin condenser units have been chosen as they will run at a lower noise level at night time.

If any other documentation is required, please do not hesitate to contact me.

Please find the following documentation and cheque for the above application.

- Planning Application – Pages 1-11
- Site Location – Page 12
- Dimensioned picture External unit – Page 13
- Technical details of the external unit – Page 14
- Sound Data / spectrum – Page 15
- Existing Front / Side Elevation Drawing – Page 16
- Proposed Front / Side Elevation Drawing – Page 17
- Proposed Plan View of Kitchen roof – page 18

Application Cheque for £177.00

Regards

Max Raffe

Applicant on behalf of Crowfield Village Hall Management Committee
