Supporting Information: 8 Overton Grove, Kilmacolm, PA13 4DR

I was asked to look at 2 trees at the above address.

There is one Ash Tree on site which is infected with Ash Die Back (*Hymenoscyphus fraxineus*) and should be removed before it becomes more of a health & safety risk. Ash trees also become increasingly dangerous to climb and dismantle so we would suggest carrying out this work as soon as possible.

The owner would also like us to fell and remove 1 Willow Tree which has now outgrown its situation and is too big for the garden.

I can confirm that all works would be carried out in accordance with BS3998: Tree Work Recommendations.

The owner is happy to replant 2 smaller growing native trees if the application is approved.

I have attached some photographs that were taken when on site.

If you would like to meet for a site visit, we can arrange this.

Yours Sincerely,

Kate Wilson.

RFS Cert. Arboriculture
HND Forestry.

Ash Tree (T1)

Willow Tree (T2)
