

## Proposed works for Hillside Cottage, Little Barrington OX18 4TE

- Secondary glazing to the windows at the front of the property (photo 1) and the side windows on the top floor (photos 2 & 3)

**Photo 1:** front of property. Secondary glazing to be added to the 4 sets of mullion windows to the LHS and RHS of the front door on both the ground and first floor. Additional secondary glazing to be added to the ground floor window to the LHS of the garage.

- The proposed secondary glazing is a removable secondary glazing system. Magnetic strips are fixed to the side of the mullion which fixes the secondary glazing in place.
- The secondary glazing can be easily removed for cleaning. Everything can be removed without damaging the windows or changing the character them.

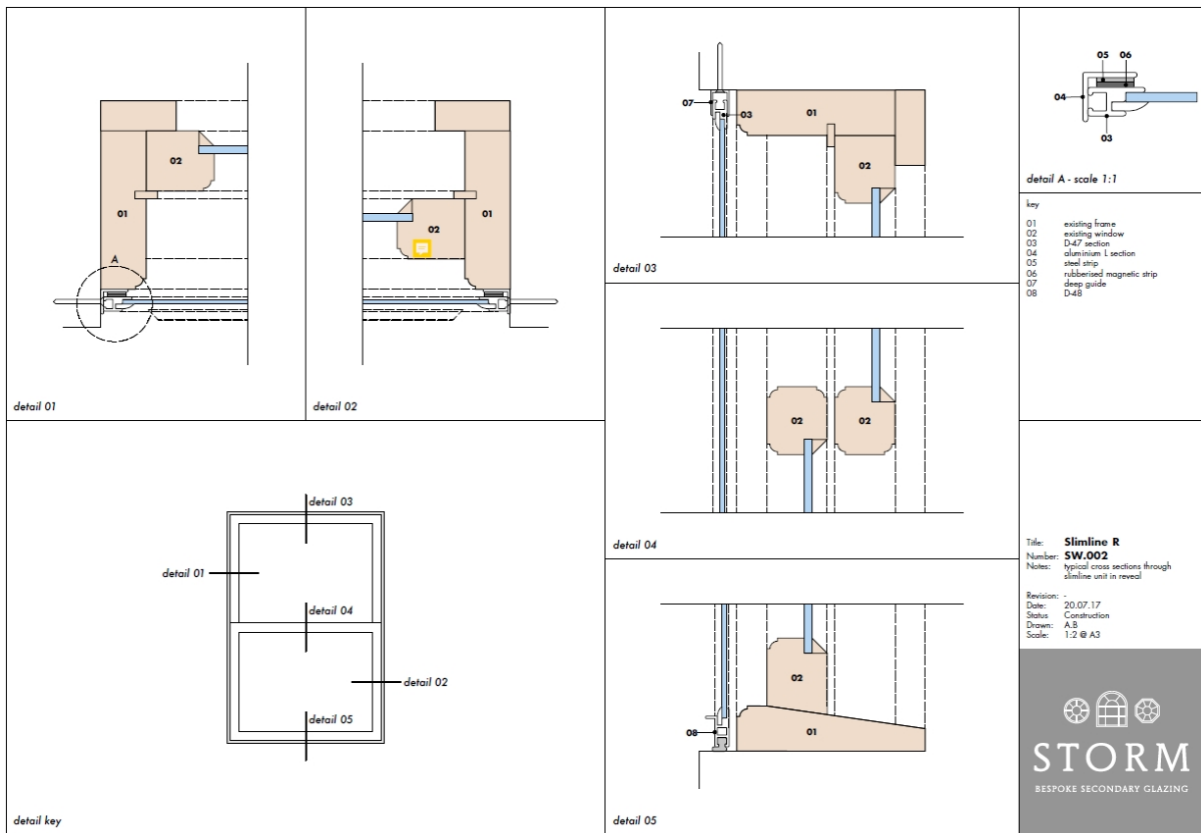

**Photos 2 & 3:** showing the second floor windows on the side of the property (1 on the LHS, 2 on the RHS) where secondary glazing will be added

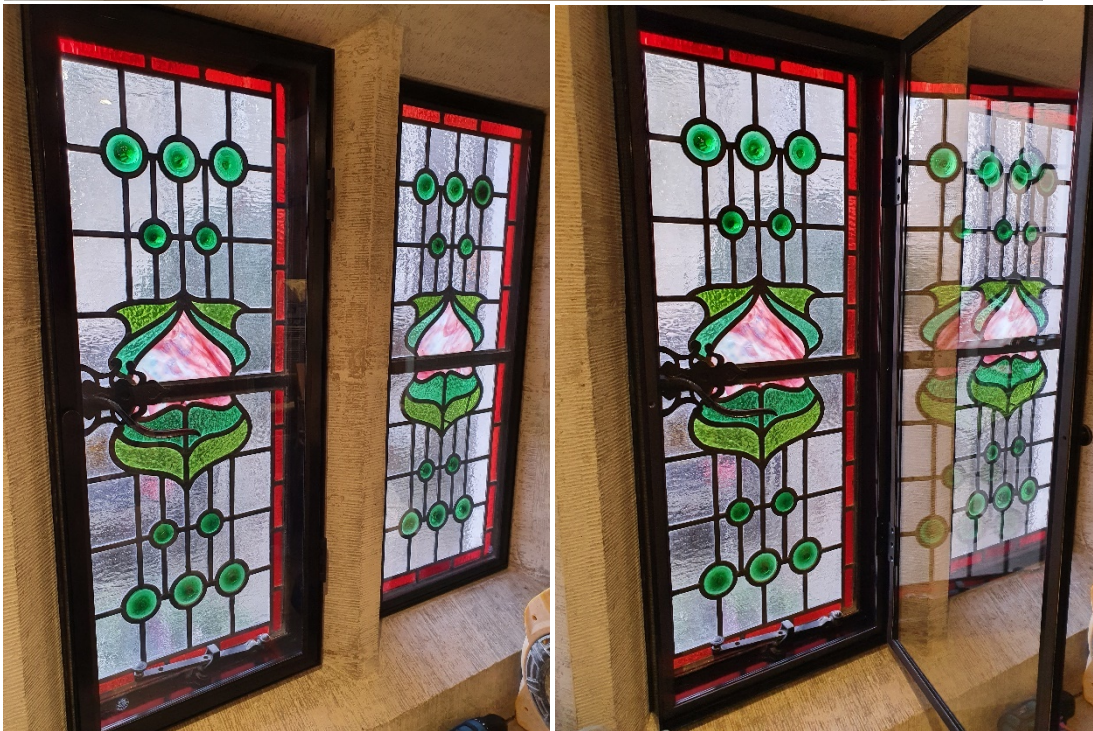

- Photos of the mullions from the inside of the property are included below (Photos 4 & 5)
- Sample photos of the system from a different property (photos 6, 7, & 8), which show quite similar mullions in a listed property
- Photo 8 shows the system works for the sections with opening casements.
- A technical drawing is also included.

Photos 4 & 5: showing one of the mullion window casements from inside and the centre casement opens

Technical Drawing
