Site - Underwater Lights Ltd, Great Dunton Forge, London Road, Dunton Green, KENT.
TN13 2TD

Development - Increase height of building under Minor Material Amendment.

To vary the approved development (19/01000/FUL) under this application 19/03206/FUL

Hi All,

I have attached one original and 3 copies for my application 1903206/FUL.

The elevations show the colour / type of brick which is very close to the original brick work. All windows will be double glazed mounted in hard wood frames with natural colour varnish. The roof will be slate. The type of solar panels we are looking at are the LG NeON 2 BiFacial.

The site as it stands at the moment has the footings for the steel and brick work finished and this has been inspected by Building Control. The area outside the foot print of the build has had its first layer of tarmac. When the building is finished the second hard coat will be laid. The site is now very clean and there are two accesses for entrance and exit. There is sufficient parking and storage of materials

Should you require any further information please contact me by email peter
@underwaterlights.com or by phone 01732 455753.

Thankyou for your help so far

Peter Urquhart
