

## Statement for replacing windows for 7 Park Circus Place, Glasgow, G3 6AH

Following on from the survey carried out at the above address

- As per the aims of the Scottish government, the property would greatly benefit from having double glazing and draught proofing installed as to increase the energy efficiency of the property.
- Installing double glazing would also help Glasgow City Council meet its aims of making homes more energy efficient.
- The character of the area remains the same as the windows are manufactured like for like.
- Windows are in poor condition and have pretty bad rot

Any new windows would be manufactured in a like for like formation to replicate the existing in neighbouring properties with original windows, horn and moulding detail would also be manufactured to existing.

Yours Sincerely,  
Iain Ritchie
