

Screen Wall / Fence (1.8m)

NB. ALL TIMBER TO BE TREATED WITH PRESERVATIVE.

All timbers to be pressure impregnated with suitable preservative

ON EXPOSED SITES STRUCTURAL ENGINEER TO BE CONSULTED TO CONFIRM DESIGN.

Movement Joints

These should be continuous for the full height of the wall and spaced as below. For lateral stability, slip ties (stainless steel) should be incorporated at movement joints and wherever a free standing wall abuts a building.

Clay bricks: 16mm wide movement joints every 12m. First joint no more than 6m from the end.

Calcium Silicate bricks: Butt movement joints with separator every 9m. First joint no more than 4.5m from an end.
