

Area1 (Left of Gate) and Area2 (Right of Gate)

Inside of Troika railings – we are planting 3 trees (around 3-4m) - *Cedrus atlantica* 'Glauca', *Camellia japonica* 'Ave Maria', *Liriodendron tulipifera* 'Fastigiatum' th

Outside left (Area1) and Outside right (Area2)

3 either side in the circles of *Lonicera nitida* 'Baggesen's Gold' (these match the existing planting)

In GREEN areas (behind cypress) – Cherry Laurel – recommended for the poor clay soil and shade – should thicken quickly and match original to left of drive.

In front of above planting will look at positioning ivy to match remainder of verge.

These two areas have been quite barren even when original house on plot see image below – the ivy and *Lonicera nitida* should improve this.

Area 3 – rear.

Green area Laurel in front of railings

Carpinus betulus (Hornbeam) required as replacement tree from TPO – about 4m height.

2 Holly (2m and can grow up to 1m per year) and 1 Yew (2m and slow growth initially)

(These are chosen to match existing plants / conditions).
