DESIGN AND ACCESS STATEMENT

To remove existing front and rear windows from the above property in Osournby.
Access to the dormer windows on the front elevation via zip up tower scaffolding during the day and removed from front and stored in rear garden area at night.
During frontal work safety signs and barriers will be erected around the scaffolding to warn pedestrians as due to the size of the front garden area the scaffolding will encroach onto the main pathway..
Works vehicles will be parked on front of house road area during working times of 9am and 5pm Monday to Friday.

Yours Faithfully

Stephen J Allenby
