

Biodiversity Enhancement Features

Eight swift bricks (WoodStone Build-in Swift Nest Box B) will be incorporated into the new dwellings and will be installed immediately under the eaves at least 5m above ground level. Swift bricks will be installed at the north facing elevations of dwelling numbers 5, 8, 9 and 21. The swift bricks should be installed as close to eaves level as possible.

Four sparrow terraces (1SP Schwegler Sparrow Terrace) will be installed onsite, fitted to the north facing elevations of dwelling numbers 3, 17 and 19, and the west facing elevation of dwelling number 12. The sparrow terraces should be installed as close to eaves level as possible.

Ten integrated bat boxes (Habibat Bat Box 001) will be installed onsite and installed at the south facing elevations of dwelling number 7 and 20, the west facing elevations of dwelling number 8 and 14, and the west facing elevation of dwelling number 13.

Bat boxes and bird boxes will be subject to visual inspections annually for signs of damage. Inspections of bird boxes will be conducted outside of the nesting bird season (March-August inclusive) and any damaged boxes will be replaced. Cleaning of the bird boxes may be undertaken by clearing out old nesting material during autumn/winter (ideally October/November). It should be noted that bats can often occupy bird boxes so extra care should be taken when removing nest fronts.
