

Tree Information

We appreciate that the property is located within an Ancient Woodland, however, we do not feel that a tree survey would be necessary in this instance as the scope of works is minimal and will not impact / disturb the Ancient woodland. The proposed porch will be positioned to the South East elevation within the curtilage of the property with a gap of 23m before the woodland starts, this area consists of existing garden and driveway. No trees or hedging will be disturbed or removed in this scheme.
