**Subject: Woolwich Cultural District (18/2892/F)  
Planning condition 16 discharge – Operation Noise**

Dear Sir/Madam,

Regarding building 40 at Woolwich Cultural District (**18/2892/F**), Gillieron Scott confirms that noise breakout from the development  $L_{Aeq, 15min}$  (continuous sound pressure level) during the daytime and night-time at the facades of surrounding noise sensitive properties should not exceed the  $L_{Aeq, 15min}$  (continuous sound pressure level) without entertainment noise present.

A separate noise impact assessment has been submitted demonstrating that the proposed internal activities will not exceed the targets as defined above for B40.

We trust the above should be sufficient to discharge/defer condition 16 of the planning approval notice. Should you require any further information of confirmation, please contact myself on the below.

Yours sincerely,

Tim Scott
