Dear Sirs

We are applying for planning permission to install a telecoms shelter as part of VXFiber FTTP telecoms network installation. We propose to install this on existing Land (undeveloped )  
Approximate Location by the , Address (near) :

Description	Grid Reference	X	Y	Latitude	Longitude	Postcode
Point FTM	17402 16367	617402	216367	51.803656	1.1519002	CO15 3TY
Regency Lodge, Elmden Court, Clacton-on-Sea, Tendring, Essex, East of England, England, CO15 3TY, United Kingdom						

We have attached to our online application a location plan, a site plan, a diagram showing the shelter and its dimensions, an FAQ document with further details of the shelter construction, and a diagram showing the proposed palisade fencing.

A site survey suggests that there should not be an impact on visibility for passing traffic, including the traffic and commuters.

The shelter is to contain active telecoms equipment, and will therefore require power, and contain backup batteries. It will be earthed, and secured, and will only require sporadic access. It will not require plumbing, nor generate waste, as it will not be in constant use.

The foundations are four concrete plinths which will minimise further impact on the surroundings, and the plinths and shelter arrive pre-built which should minimise installation works.

We are hoping to be able to install the shelter without affecting the tree currently onsite.

Yours sincerely.

Jonatan de Souza

Design and Planning Engineer
