Description

Please describe details of the proposed development or works including any change of use

We would like to add several stables into an existing barn at the property that has no other use. We have 18 acres and would like to have horses grazing on some of this land - so change of use or shared use between equestrian and agricultural for some of the acreage. The land hasnt been farmed for over 20 years - we plan to make hay or keep sheep alongside the horses. We would also like to add a 40 x 20 metres open outdoor sand school close to the barn to ride in. We will fence around this and have low level lighting for the odd occasion when riding in the winter in the early evening - lights will be off when school is not in use. Two stables have been half put up just so the guinea pigs have a big space to run around - there are no horses at the property / in the fields.

Details of the pre-application advice received

The advise was that the planning shouldn't be a problem as no major changes and is in keeping with the horse location - when we put in for this request it related to stabling and change of use, not the sand school which is an additional thing. The only query was why would 18 acres be required for only a handful of horses - this was an error on the application as that's true we wouldn't need to use all the land for this just some - perhaps a third. The rest would be for hay or sheep.

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
