

Brochure extracts of the proposed sewerage system proposed

The tank type and size will be a Klargester Biotec (18PE) sewage treatment plant – 18 population – pumped outlet. Fully buried – tank has a depth of 2.6m diameter (external) of 2.7m

Fully compliant with EN12566-3 the Klargester BioTec domestic sewage treatment plant models are available in a variety of sizes 6-25 PE (UK) to suit any domestic application. The system employs the unique aerobic trickling process technology to filter and treat the sewage.

The BioTec BTA sewage treatment system is easy to install, with low maintenance and running costs and a 2 year warranty period (when registered online) for peace of mind.

The Klargester BioTec BTA range is suitable for use across the following applications:

- Single & Multiple Homes
- Barn Conversions
- Farms
- Small Offices
