

RE Photos:

I have one photo of the flat's windows before they were changed. This is from the estate agents details 16 years ago when I purchased the property. It only shows the front 3 windows (highlighted in yellow).

I have tried to take photos of current side and rear windows. The side and rear windows can only be seen from below as shown in the photos below.

I will purchase the plans as soon as you confirm they are the correct one.

Please could you confirm that the window photos are ok and if you require any more information.

Thanks

Sarah
