

GROUND FLOOR

FIRST FLOOR

- General Improvements:
1. Insulation added to all substandard parts of the building to improve the energy efficiency.
 2. Lime plaster and limecrete in the oldest part of the building to aid in the management of moisture in the historic cob walls where no damp course is or can be present - Prolonging the life of the building.
 3. Relocation of shower facility and provision of a functional utility room will improve usability of the building.
 4. Renewing of all fixtures, fittings, electrical and plumbing systems will bring the property up to modern standard of safety and efficiency.
